Technical Specifications For Movement Joints

Movement Joints - DONMINI (UK) LTD

TG4 (Tileguard 4 - triplejoint - foam tail) Movement Joints & Side Plates

TG4 - Triplejoint (Foam tail), is suitable for use where deep joints are requested, the flexible bottom section is easily cut on site to accommodate varying slab levels, falls etc. and robust stainless steel tie bars ensure solid fixing within the screed. Triplejoint is available in 2.00m lengths.

Produced with 8mm wide polymeric seal insert, in black, cream or grey, with 1mm side plates. 12mm wide available on request.

Sideplates are available in stainless steel, brass and aluminium in standard thickness of 1.0mm. For heavy duty applications, sideplates of a greater thickness can be supplied. Standard lengths are 2 metres.

Alternative coloured inserts are available (subject to a minimum order quantity).

TG4 is also available with a **VAMAC** insert.

VAMAC has been tested and approved by London Underground Limited to meet their strict requirements for lox toxic fumes and fire resistance, under their 'Engineering Standard for the fire safety performance of materials used underground'
